DOKU
FEST

Join the Movement: A Crowdfunding campaign for a 100% Green Traveling Cinema

Dear Friends,

***Imagine gathering under the stars
in a rural village or suburban neighborhood,
sharing in the magic of cinema.***

***Not just any cinema,
but a solar-powered pop-up
that brings stories to life—stories that
spark conversations about democracy,
human rights, the environment,
and our shared cultural heritage.***

**SOLAR
CINEMA**

Since 2002, DokuFest has been on a mission to bring people together through the power of film.

What started as a humble three-day event has blossomed into the largest cultural festival in our country, celebrated over nine vibrant days and nights.

We've showcased films, music, children's performances, photo exhibitions, and so much more—all fueled by the passionate spirit we call the "DokuFest spirit."

In 2012, with the support of the Prince Claus Fund, we took our love for storytelling on the road, creating a Traveling Cinema to reach rural communities.

Then in 2016, we partnered with the World Solar Cinema Network, and the European Union to add solar panels to our van, transforming it into a Traveling Solar Cinema.

This allowed us to bring unique and thought-provoking films to places that rarely have access to such cultural experiences—all while harnessing the power of the sun.

***Now, we're ready
to take the next big step,
and we need your help.***

*We aim to transfer
our solar panels and batteries
to an electric vehicle,
making our Traveling Cinema
100% green.*

SOLAR CINEMA

*This isn't just about upgrading a vehicle
it's about committing to a sustainable future
and continuing to inspire communities
without harming our planet.*

*By supporting our crowdfunding campaign,
you're not only helping us reduce our
environmental footprint, but also ensuring
that we can keep bringing impactful stories
to the people who need them most.*

*You're fostering social cohesion,
promoting education,
and nurturing the next generation
through the arts.*

Every contribution counts.

*With your help, we can continue
to light up screens and hearts
across the countries,
while setting an example
of how culture and sustainability
can go hand in hand.*

*Join us in making a difference.
Let's drive towards
a greener future together.*

With heartfelt gratitude,

The DokuFest Team

For Contributions

Your support can make a real difference in bringing our 100% green Traveling Solar Cinema to life.

If you'd like to contribute to this initiative, please consider making a donation on our webpage at
